## SUMMARY

25X1

## FAR EAST

2. French estimate Viet Minh capabilities (page 3).

## EASTERN EUROPE

3. Large numbers of empty boxcars move east from East Germany (page 3).

- 2 -

25X1A

2. French estimate Viet Minh capabilities:

25X1A

A French official in Tonkin has informed US Consulate Hanoi that the Viet Minh can regroup and resupply themselves sufficiently within three weeks to launch another offensive in the Red River Delta and, in such an event, probably would achieve better coordination than in the January attack. The official added that there was, however, no indication that an imminent Viet Minh action was planned.

EASTERN EUROPE

3. Large numbers of empty boxcars move east from East Germany:

25X1A

from 9 to 23 February four trains of approximately sixty empty boxcars each and one or two trains of sixty flatcars

25X1

equipped with side racks were dispatched daily from Frankfurt-am-Oder to Brest Litovsk. [ ] since 15 February most locomotives in the Frankfurt-am-Oder area have been employed on missions to the east.

Comment: This is the first report that large numbers of boxcars have moved east. If it is true, approximately 3,000 boxcars would be involved. Beginning February 20, unusually large numbers of empty flatcars capable of transporting military equipment and vehicles (although only a few can carry tanks) were assembled at various points in the Soviet zone and moved east to Brest Litovsk. In view of these reports, an influx of Soviet military units into East Germany, possibly destined for the still largely-unoccupied Zossen-Wuensdorf area, is a distinct possibility. About 1,800 freight cars are required to transport one full-strength Soviet mechanized division; the number of cars believed to have moved eastward would suffice for about three divisions.
